

NEXT GENERATION PROTEKTIV
CERAMIC

TECHNOLOGICALLY ADVANCED WINDOW FILM

CUTTING EDGE
TECHNOLOGY.

Next Generation Protektiv Ceramic automotive film features the latest global technology, offering superior performance compared to all other window films.

Ceramic technology brings appreciable heat reduction, stylish looks and significant Anti-EMI properties. Plus, you'll discover it's outstanding optical clarity enhances your view, both night and day.

EXCEPTIONAL CLARITY + ANTI-EMI PROPERTIES

Unlike dyed or metalised films, spectrally tuned ceramic films offer superb heat rejection properties without compromising visibility. They're also low-reflective and don't appear shiny.

Next Generation Protektiv Ceramic is a 100% colour stable tough durable film that won't fade or discolour. It's superior optical clarity results from the engineering of nanotechnology to create a ceramic composition so small that, not only is it invisible to the naked eye, but it can't even be detected under a regular microscope.

It also delivers an appreciable reduction in solar heat passing through the glass.

Next Generation Protektiv Ceramic is 100% metal free which helps eliminate electromagnetic interference (EMI) with electronic devices such as GPS, car radios and mobile phones and is backed with a nationwide Limited Lifetime Warranty*.

SO MANY REASONS TO CHOOSE

- Ceramic, metal free construction.
- Nanoscopic particles absorb infrared rays.
- Colour-stable non-reflective appearance.
- Provides up to 99% UV protection.
- Minimises fading of interiors and protects finishes.
- Global Ceramic Technology delivers superior optical clarity.
- Eliminates EMI (Electromagnetic Interference).
- A tough durable film that won't fade or discolour.
- Delivers a reduction in solar heat passing through the glass.
- Significant glare reduction.
- Independently tested and certified by ARPANSA (Australian Radiation Protection and Nuclear Safety Agency).
- Backed by our nationwide Limited Lifetime Warranty*.
